To the members of the Common Council

Gentlemen:- I herewith return appropriation ordinance no 28. "An ordinance appropriating (\$500.00) for the use of the Department of Public works to assist the property holders to pay for the pavement on wells and Superior Streets from the St. Marys Bridge to Harrison Street" Disapproved.

(over)

The report of the Finance committee and the passing of this ordinance by your Honorable body appropriating five hundred dollars out of the General fund for the relief of the property owners on Superior Street from Harrison Street to the Wells Street bridge, is an innovation from the policy pursued by the City and the results in my opinion, will be so far reaching that we should pause and calmly, without bias, consider the question.

You all know what has been the policy and the course pursued by the City in regard to the payment for improvement of streets. We now have fifteen miles of paved streets covering all parts of the City. The cost of said pavements has been paid by the owners of the abutting property, the City paying only for street and alley crossings. Whether this policy is the most equitable fair and satisfactory that could or might have been adopted is not under consideration. The question that is to be considered is whether it is advisable or desirable to depart from the course pursued for so long a time and pursue a course which will result in contention and bitterness between citizens and those who are called upon to administer the affairs of the City.

The payment of this money by the City, in my opinion would be an act of injustice to all the property owners owning property abutting on the streets already paved and for which pavement they have paid in full without any assistance from the General fund. Is it fair or just that they should pay in full for their own pavement, and also be compelled to contribute for other pavements than their own in other parts of the City?

An argument urged for this appropriation is that the property on Superior Street has in years gone by, paid for two or three pavements which have worn out. The petitioners do not allege that the pavement is not needed but that the necessity was caused, not by themselves, but from the great amount of traffic passing over Superior and Wells Streets; that it is a great thoroughfare over which the traffic of the City was obliged to pass in order to reach the outlet afforded by the Lake Shore and Michigan Southern, and the Lake Erie and Western Railroads. The advancement of this argument naturally calls attention to other streets of the City. Is Superior Street so much more of a thoroughfare than Calhoun, Main or Columbia Streets, or Spy run Avenue, that it needs special attention?

I believe it to be a fact that in one month with another more vehicles pass over the west main street bridge than over the wells street bridge, also, that spy run and the east ledumbia street bridges are not far behind in the number of vehicles passing over them. at least it must be admitted that the traffic upon these various streets is not so radically different in extent that any one needs special aid

It is plain to everyone that at no very distant time Calhoun Street will need a new pavement. This Street has already had three pavements. Shall a donation be made from the general fund to assist in paying for a new pavement for Calhoun Street, or any other Street?

If this ordinance prevails where is the end of such cost on the general fund? If this ordinance prevails will not the property owners abutting on streets already paved and paid for, have, if not a valid claim in Law, at least a valid claim in equity and justice for a refund.

The petition on which your action is based specifically asks for relief from Calhoun Street to the wells street bridge. The ordinance specifically designates that the relief granted by your Honorable Body shall be to property owners between Harrison Street and the wells street bridge. Why so discriminate? Are not the conditions the same in regard to the property owners between Calhoun Street and Harrison Street as they are to the property owners between Harrison Street and the wells street bridge? They have all paid for the same number of pavements in the same time.

The property owners from Harrison Street to the wells street bridge have not been subjected to greater burdens in regard to the paving of streets than the property owners between Calhoun and Harrison Streets.

If it is proper to grant relief to a portion why not to all under same conditions? It is a settled principle that taxation must be equal.

That one portion cannot be exempt from any other of the people under like circumstances. Would not the property owners between Calhoun and Harrison Streets have valid grounds for resisting the assessment against themselves at least so far as the relief granted to the property owners between Harrison Street and the wells street bridge was not extended to them.

Respectfully Submitted
